

1. Swagger page showing the employee endpoints.

2. GET employee list response with the Authorization header.

3. bad request response when the header is missing.

The screenshot shows the Postman interface with a POST request to `http://localhost:5166/api/employee`. The request body is a JSON object:

```
1 {
2   "id": 3,
3   "name": "New Employee",
4   "salary": 22000,
5   "permanent": true,
6   "department": {
7     "id": 3,
8     "name": "Sales"
9   },
10  "skills": [
11    {
12      "id": 4,
13      "name": "DotNet"
14    }
15  ]
16 }
```

The response is a **400 Bad Request** with a status of 201 ms and 182 B. The message is "Invalid request - No Auth token".

4. exception response for `throwError=true`.

The screenshot shows the Postman interface with a GET request to `http://localhost:5166/api/employee?throwError=true`. The response is a **500 Internal Server Error** with a status of 150 ms and 202 B. The message is "Something went wrong. Check the log file."

5. the log file or folder showing `Logs/exceptions.txt`.
